# Revitol Cellulite Solution

The [Revitol Cellulite Solution](#) is a topical cream that is applied directly to the affected areas of the skin. It is pumped full of all natural ingredients that combine to metabolize the fat underneath the skin in a natural way, to reduce dimples and bumps associated with cellulite. This cream solution is applied 3-4 times per day, and can produce results in only a few weeks.

## Ingredients

There are many natural ingredients included in the Revitol Cellulite Solution, including Retinol A. This is a type of vitamin A which works to revitalize and smooth the connective tissue and skin of your body. Caffeine is another main ingredient in the Revitol formula. It has been shown in studies to reduce cellulite, but must be applied directly to the affected areas in order to produce results.

## Other natural ingredients within Revitol Cellulite Solution include:

- L-Carnitine
- Algae
- Green Tea
- Shea Butter
- Capsicum
- Horsetail Extract

## Advantages

Revitol Cellulite Solution is an easy system to use. You simply apply it to the affected area and leave it. There are no several part system to follow, and results can be seen a few weeks after treatment. There are also no bad odors or slimy residue associated with the cream, as it goes on smooth without being oily.

Both men and women can use the Revitol cream, and it is available directly from the company, so no middleman is involved. There are no side effects associated with this cream, as it is made from all natural ingredients, and it does not produce a tingling sensation when applied to the skin.

## Disadvantages

Many people like to achieve instant results. If the Revitol Cellulite Solution is not used as directed, then it will not produce the desired results. Even when it is applied correctly, it must be used 3-4 times per day which is more than other cream treatments require. It can take two to three weeks of proper use to see noticeable results, so if you are in search of an instant fix this is not the product for you.

## **Cost**

A jar of the Revitol Cellulite Solution cream costs \$39.95, and how long it lasts purely depends on the size of the area that you want to treat, and the number of times that you apply it. If you can get results within the first three weeks, and if you can manage to keep the cellulite at bay, then the Revitol cream can be a tremendous value about other alternative cellulite treatments.

## **Who Would Benefit From This Product**

The person who would benefit most from this product is one that may not have the money for more expensive cream treatments. It would also benefit people who are looking for a safe alternative to prescription creams or other cellulite treatments which have harmful side effects and risks involved. For this product to work for you, you must remember to apply it daily, and you must be willing to wait a few weeks in order to see results.
